

FREQUENTLY ASKED QUESTIONS

WHAT IS SOLID RAIN?

Solid Rain is a potassium based powder like substance that is able to retain up to 500 times its size. It's beneficial for agriculture because it allows to encapsulate all the water that would otherwise be evaporated. After Solid Rain encapsulates the water its moisture is retained underground available to the roots of any plant to access them when they need water. After all water is dispersed, Solid Rain is ready to absorb more water. This cycle can be repeated for up to 10 years.

IS IT SAFE?

Solid Rain is completely safe for any person, crop, or animal alike. Its molecular build up consists of potassium, carbon, hydrogen, oxygen, and other substances that are already found within your soil. You can download our MSDS at www.solid-rain.com.

HOW DO I APPLY IT?

You can find our instructions on: www.solid-rain.com/instructions you can also find them below (for agricultural use, please contact us).

For Plants, Pots, and Home Gardening

Step1: Mix Solid Rain (20grams) with 1 liter water.	Step 2: Wait 10-20 minutes for water to crystalize.	Step 3: Mix with soil.

HOW LONG UNTIL I GET A RETURN ON MY INVESTMENT (FOR FARMING)?

Throughout our years in the industry we have noticed that the investment is recuperated within the first year to year and a half. Solid Rain cuts down on water costs, man power, fertilizer, and most costs associated with irrigating your crops.

I'VE SEEN SIMILAR PRODUCTS, WHAT MAKES SOLID RAIN BETTER?

You can find other products that claim they are similar to Solid Rain. However, the differences are in the results of the product. Our product is based on potassium which does not limit the growth of any plant and it allows the product to be used from 8-10 years, while having it encapsulate up to 500 times its original size. Other products cannot make this claim.

WHAT KINDS OF PLANTS CAN I USE SOLID RAIN WITH?

Any plant is suitable for Solid rain. As long as you apply the product to the roots of the plants then you will have amazing results. Think of Solid Rain as taking the water that you already use and having it available in solid form to apply to your plants and crops.

WHERE CAN I PURCHASE SOLID RAIN?

You can purchase Solid Rain at www.solid-rain.com/buy. We are receiving applications to become distributors so please check with us for distributors near your home town. If you are interested in becoming a distributor, please reach us at info@solid-rain.com.

WHERE IS YOUR PRODUCT MANUFACTURED?

We can proudly say that our product is made in the USA.

WHAT IF I HAVE MORE QUESTIONS THAT ARE NOT ANSWERED ON THIS SHEET?
